Chapter Preface

This site contains information about the nShield Security World Software Release support policy and details of the supported releases along with direct links to their release notes.

1. Security World Software Release Policy

Entrust has recently introduced an update to the nShield Security World Software release policy to better define the type of release and the associated update and support policy. As part of this, the concept of Long Term Support (LTS) and Standard Term Support (STS) software releases has been introduced, with each software release being either a LTS or STS release.

[nShield Security World Software Release Policy](#) contains details of the different software release types and the support and updates provided with those different releases.

2. Security World Software Release Information

For the latest information on the supported Security World software releases and their associated firmware and Connect images along with details of their release type and support details, see [nShield Security World Software Support Details](#).
